

Universal machine

GS 401

- ◆ Filling grinding
- ◆ Cleaning of formwork
- ◆ Power-floating and trowelling
- ◆ Grinding of glue remainder from old carpets
- ◆ Concrete grinding
- ◆ Stone and clinker paving
- ◆ Marble polishing etc.

TREMIX Universal machine GS 401 is a high-efficiency, low-weight machine intended for low and narrow areas. The machine works equally well on both roughly and finely filled surfaces. It is easy to operate, robust and reliable. All the operating controls are placed on the handle. The GS 401 is equipped with a dead man's grip safety device which features a lightly spring-loaded, turnable grip with two-way motion. At start, the grip must be turned forwards so that the safety switch will be on and acts upon the contactor.

The handle is foldable and lockable in a comfortable working height.

The transport wheels and the foldable handle facilitate transporting.

A grinding plate with stones is used for removal of concrete splash on floors and for filling grinding. A rubber coated grinding plate with grinding paper is used for fine-filling.

The working tools are easily interchangeable- only a hexagon socket cap wrench is required.

A jointing tool with rubber blades is used for filling joints for stones and clinker paving.

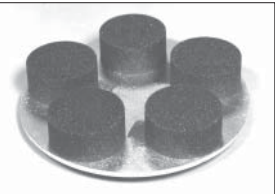

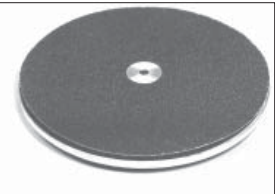

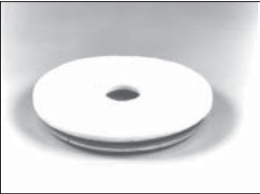

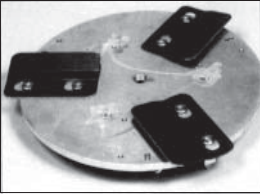

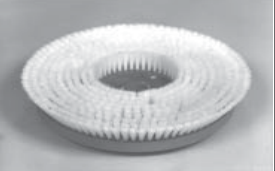

A floating disc and trowelling blades for casting of smaller areas and for the prefab industry.

In other words, a highly versatile tool.

Technical data GS 401

Power	1.1 kW	Max. reach	3 m
Type of current	1-phase, 50 Hz	Weight without grinding plate	abt. 35 kg
Voltage	230 V	Weight grinding plate with stones	abt. 12 kg
Rated current	9 A	Weight grinding plate with grinding paper	abt. 10 kg
Outer diameter of machine	490 mm		
Outer diameter of grinding plate	400 mm		

Accessories GS 401

	Grinding	Part No.		Part No.
	Grinding plate for stones	31879		Scour nylon plate for scour disc
	Stones	1565		32267
	Disc for grinding paper	31880		
	Grinding paper No.24rough	1564		Scour disc, nylon
	Grinding paper No.36 fine	1563		1915
	Jointing			
	Jointing tool with 12 rubber blades	11587		Tools required when the machine is used for floating/ trowelling
	Extra rubber blades	46972		
	Plate brush, piassava	1911		Trowelling tool including protection ring and trowelling blades
				11583
				Extra trowelling blades
				46901
	Plate brush, nylon	1912		Floating disc
				31911
